
Vivien 2011

Release Notes

March 2011

Thank you for installing Vivien 2011. These release notes provide the most up-to-date information about content and fixes made to the application.

To Help You Get Started with Vivien

To help you get started using Vivien, a number of sample files and various documentation sources are available for your use.

Documentation sources

Documentation sources are available in several locations for your convenience:

- from the Vivien Install panel during installation
- on the Vivien 2011 CD (in the \Support Documentation folder)
- from the Start>Programs>Vivien 2011 shortcut menu (once Vivien has been installed)
- from the Vivien Web site <http://www.viviendesign.com/>

Sources include:

- User's Guide
- Getting Started Guide
- Release Notes

Sample files

Sample Vivien files are provided with the installation for you to use as examples or references. These files can be found in the \Samples folder where you installed Vivien (for example, C:\Program Files\Vivien 2011\Samples).

Vivien Virtual Event Designer compatibility with *wysiwyg*

Vivien is fully compatible with CAST Software's award-winning lighting design software suite, *wysiwyg*. You can create your events in Vivien and then open the files in *wysiwyg* if you want to add even more sophisticated lighting effects.

You can use Vivien Virtual Event Designer to increase your planning efficiency. Vivien is the sales, planning, design, and production tool designed for the meeting and special events industry. Once you have created your event in Vivien, you can share your file with a Lighting Designer who can open it in *wysiwyg*. In this way, you can exchange ideas and share updates to your files, taking advantage of the file compatibility between Vivien and *wysiwyg*.

While Vivien deals with the venue, *wysiwyg* deals with the stage. However, both *wysiwyg* and Vivien:

- Feature simplified CAD tools to plot or lay out floor spaces or lighting plans
- Deliver photorealistic renderings of these drawings
- Contain 1000s of library objects designed for the industry
- Share the same reliable, robust base code
- Deliver eye-popping visuals
- Provide Wizards for common tasks

Recommended system requirements (for general Vivien usage)

- Intel Core Duo or compatible processor, 2.0 Ghz or better
- Windows XP with Service Pack 3 (or later) or Windows Vista with Service Pack 1 (or later)
- MAC Intel Processor platforms with Windows XP (SP3 or later) or Windows Vista (SP1 or later) (on Bootcamp configuration or with Parallels software installed)

Note: When running Vivien on a MAC with Bootcamp, performance is comparable to running Vivien on a PC. When running Vivien on a MAC in Parallels, performance is slightly degraded when compared to a PC.

- 2048MB or 2GB RAM
- 1024MB or 1GB free disk space (NTFS file system)
- 1024 x 768 or better resolution
- PCI Express Video Card with OpenGL-accelerated display adapter with 256MB (or better) video memory
- OpenGL 2.0 Support for new visualization
- USB port for dongle security

High performance system requirements (for best response and rendering time)

- Multi-CPU Computer or better with Multi-Core processor technology, Intel Dual/Quad Core or AMD Opteron
- Windows XP with Service Pack 3 (or later) or Windows Vista with Service Pack 1 (or later)
- MAC Intel Processor platforms with Windows XP (SP3 or later) or Windows Vista (SP1 or later) (on Bootcamp configuration or with Parallels software installed)

Note: When running Vivien on a MAC with Bootcamp, performance is comparable to running Vivien on a PC. When running Vivien on a MAC in Parallels, performance is slightly degraded when compared to a PC.

- 4096MB or 4GB RAM or greater
- 1024MB or 1GB free disk space (NTFS file system)
- 1024 x 768 or better resolution

- PCI Express Video Card with OpenGL-accelerated display adapter with 512MB (or better) video memory
- OpenGL 2.0 Support for new visualization
- USB port for dongle security

Video card requirements to display Enhanced Beams

To display our beam simulation in the Virtual Views, the video card requirements have changed for Vivien 2010 and beyond. Our new simulation feature takes advantage of advanced graphical technologies available only in OpenGL 2.0. As a result, your computer must have a video card that supports OpenGL 2.0 to run the latest version of Vivien with its enhanced features. If you do not have this type of card, a warning appears and the Enhanced Simulation option will not be available. However, you will still be able to run the software and visualize the beams with our original beam representation.

Additionally, for renderings to complete sooner/quicker, a faster, multi-core processor is recommended. Recommended processors include, but are not limited to, Intel Core2 Duo, Intel Core2 Quad, Intel Core i7, AMD PhenomII X2 and AMD Phenom II X4.

Hard drive compatibility

Due to restrictions in file name length, you cannot install Vivien on a FAT32-formatted hard drive. Instead, you must install the product on an NTFS-formatted hard drive. For details, see http://www.viviendesign.com/howto.html?tab=Installation_Note.

Dongle security

From time to time, CAST updates its security protocol to protect its intellectual property and the investment of its End Users. To that end, we have improved the security of our Vivien product, replacing Vivien's soft security solution with a hard security dongle solution.

Your dongle is not only the key to open your Vivien software, but it also carries a security protocol and other information embedded on it that establishes you as the registered licensee (thus protecting your investment).

The dongle security system also provides more flexibility to you, the user, because your Vivien license is stored on the dongle and can travel from one computer to another. With a portable Vivien license, you can work on whichever computer you need to use: office, home, or laptop.

Finally, this new dongle security system works on 64-bit Windows operating systems which now means you can install and use Vivien 2011 on these computer platforms.

NOTE: Existing Vivien customers who wish to obtain Vivien 2011 must transfer the soft-security license for a hard-security dongle. The process of transferring your existing serial code for a dongle with a new security code uses the Vivien Licensing Transfer

Utility (VLTU), as described below. Please contact CAST Software for information about obtaining a dongle to start using Vivien 2011.

Vivien Licensing Transfer Utility (VLTU)

Customers who upgrade their Vivien membership to become eligible to use Vivien 2011 will receive a small, plastic device that plugs into the USB port of your computer called a dongle. (To work with Vivien 2011, you must plug your dongle into your computer **every time you run Vivien.**) This dongle is accompanied by a software installer that will install the VLTU on your computer.

General steps for transferring your existing Vivien license to Vivien 2011

Note: You must install the VLTU on the computer on which your old version of Vivien is installed.

1. Before you plug the dongle into your computer, install the VLTU from the installation CD that you received with the dongle.
2. Once the VLTU installation is complete, ensure that the computer is connected to the Internet (a requirement for the utility to work).
3. Plug the dongle into a USB port on your computer.
4. Run the VLTU by double-clicking its icon on your desktop.
5. Follow the instructions in the utility. As it runs, it will deactivate your old version of Vivien.
6. When prompted by the utility, insert the new dongle received and continue. The VLTU will transfer your license to the new dongle plugged into the USB port.
7. Once the VLTU process is complete, start Vivien 2011 with the dongle plugged in.
8. Follow the prompts to register your new dongle. If this automated process fails, you must contact CAST Software Technical Support to register your new dongle.

Toll-Free Tel: +1.877.989.2278 / **Email:** techsupport@cast-soft.com

New in Vivien 2011

Vivien 2011 contains the following new or enhanced features:

New Features

General Features

- **Video Playback:** Vivien 2011 enables you to play back video on various screens. You can:
 - Embed video on Projector Screens created through the Projection Wizard
 - Attach video to AV objects (such as Plasma Screens and Projection Screens)

- Project video using special AV equipment (Small, Medium, and Large Projector)
- **Environmental Lighting Tool:** This new designer tool enables you to modify the ambient and time of day settings in the Lighting Quad and Virtual View tabs.
- **Text toolbar:** Using the new Text toolbar, you can adjust the font style, font size, and text alignment of a selected text label. You can access this toolbar in the Drawing Wireframe/Quad and Layouts tabs.
- **Alignment toolbar:** The Alignment toolbar enables you to align selected objects with the click of a button in the Drawing Wireframe/Quad and Layouts tabs.
- **PDF Printing:** Vivien 2011 comes with a specialized PDF printer that enables you to save files in PDF format. This option is available in the Spreadsheet and Layouts tabs.
- **Support for AutoCAD 2010 DWG/DXF:** Vivien 2011 supports the import and export of AutoCAD 2010 DWG/DXF files.
- **Support for SketchUp 8.0:** Vivien 2011 supports the import of SketchUp 8.0 files.
- **Vivien User Data (*.vud) Files:** Vivien settings that are specific to a particular installation of the Vivien software can be saved in an eternal file with a .vud extension. This file can be loaded by Vivien 2011 and beyond to reload user settings saved in the .vud files. Using .vud files, you can share your custom user data between multiple computers, and when upgrading to newer versions of Vivien.

You can save the following user settings in a .vud file:

- Custom Gobos
- Custom Library Items
- Toolbar Positions

Drawing Wireframe/Quad Enhancements

- **Send to back/front** enables you to manipulate the draw order for various Wireframe items.
- **Convert lines into surfaces.** This feature enables you to take any line and extrude it into a surface. This tool can be found on either of the Drawing tabs under Modify > 3D Transform > Lines into Surfaces.
Note: If the line is not closed, this operation will close it by connecting the start and end points.
- The **Shape tool** enables you to create polygons of various shapes and sizes. You can access this tool on either of the Drawing tabs under Draw > Shape.
- **New Dimension Tools**
Vivien 2011 offers the following new dimension tools:
 - Arc Length
 - Radial
 - Protractor

From the **Draw** menu, you can now add information about arcs and circles using the new Arc Length and Radial dimension tools. After drawing a circle or arc in your file, select it, and then click the appropriate option from the Draw menu to add these new dimensions to your file. To find out more about the new dimension tools, please refer to the Vivien User Guide.

- **Cycle Selection:** This feature enables you to select an object that shares an edge with another object. To activate Cycle Selection, press SHIFT before clicking to select. When Cycle Selection is active, Cycle On appears in the Vivien Status Bar. To select the object, you must click on a spot where two or more lines overlap or intersect. To continue selecting, keep pressing SHIFT to cycle through all items that share the area where you clicked.

Virtual View Enhancements

- **Improved Camera Controls:** Improved camera controls enable you to do the following:
 - Lock the current camera to prevent accidental movement
 - Save the existing view in Virtual Views as a new camera
 - Switch between cameras using numerical hotkeys
- **3Dconnexion compatibility** Vivien is now compatible with 3D mice manufactured by 3Dconnexion. When used in conjunction with Vivien, the 3Dconnexion mouse gives you full Virtual View control in 6 Degrees of Freedom.

Lighting Design Tools

- **Pan/Tilt lock** in the Light Tool enables you to restrict fixture movement to a particular axis when using the Focus trackpad. Note that this restriction only applies to the trackpad itself and will not prevent the clicking and dragging of the beam in any direction in a Wireframe view.

Layouts Enhancements

- **Lock Object:** You can now lock any object to avoid accidentally moving it once it's in place. To lock an object, select it and click **Modify > Lock**.

Spreadsheet Enhancements

- Import/export worksheets from/to MS Excel 2007/2003/2000/XP/etc. format. Vivien 2011 offers support for XLS, XLSX, and CSV file formats.
- Cell Formatting of common cell categories is now available, including Number, Currency (top currencies around the world and their symbol supported), Date, Time, Percentage, and Scientific.
- You can insert images into spreadsheet cells.
- You can add cell borders to divide sections of the worksheet and improve its appearance and legibility.
- There is a new Text formatting toolbar on the Spreadsheet tab to simplify text formatting.
- Column sorting is now available (ascending/descending).

- You can use smart cells to introduce a drop-down list in the current worksheet cell containing all of the available variables for the show. When the cell is selected, a drop-down appears displaying potential variables (taken from Document Options > Event Info). When a variable is selected, the corresponding text defined in the Document Options is displayed in the cell (for example: Event, Client, etc.).
- Formulae:** Over 100 formulae for common mathematical and logic functions are supported (formulae must be manually entered). Examples of formulae include:

ABS: determines the absolute value of the specified value, cell or expression
Example: =ABS(-4) gives output 4

AVERAGE: finds the averages of a list of values.
Example: =AVERAGE(1,2,3,4,5) gives output 3

CEILING: rounds a number up to the nearest multiple of the specified value.
Example: =CEILING(-2.3, -1) rounds to the closest whole number in the negative range, gives output -3

FLOOR: rounds a number down to the nearest multiple of the specified value.
Example: =FLOOR(2.3, 1) rounds to the closest whole number in the positive range, gives output 3

MAX: returns the maximum value from a given list of values.
Example: =MAX(1,2,3,4,5) gives 5

MEDIAN: returns the median, or the number in the middle of the provided set of numbers.
Example: =MEDIAN(1,2,3,4,5) gives 3

MIN: returns the minimum value from a given list of values.
Example: =MIN(1,2,3,4,5) gives 1

SUM: returns the sum of cells or range of cells.
Example: =SUM(1,2,3,4,5) gives output 15

Library Additions Vivien 2011

Total Library Additions:

Fantastic Backdrops	637 items
Textures	21 items
Office Accessories	5 items

Furniture from CORT	251 items
AV Items	2 items
Rose Brand fabrics	47 items
Total Items	866 Items

The following additions were made to the library in the Vivien 2011:

Objects -> Imperial/ Metric -> Musical Items -> Percussion A/V -> Video Projectors	Drum Kit
	Small Video Projector
	Medium Video Projector
	Large Video Projector

Fixes – Vivien 2011

The following issues were resolved in the Vivien 2011:

1. **Bug description:** Miscellaneous issues in the Drawing Wireframe's Align tool.
Fix: The tool has been updated with multiple fixes to improve its reliability and accuracy.
2. **Bug description:** Saturation in the Colour section of the Light Tool (Lighting Wireframe, Lighting Quad, Virtual View) was set to white by default, which meant that the saturation slider would have to be set to grey before a colour could be selected for a fixture.
Fix: The saturation slider is now set to grey by default.
3. **Bug description:** Group selection and control in the Vivien Layouts tab was problematic.
Fix: Group selection and control in the Vivien Layouts tab has been improved.
4. **Bug description:** Vivien would crash intermittently while working in the Layouts or Spreadsheets tabs.
Fix: This issue has been resolved.
5. **Bug description:** There were content visibility issues reported in the Cell Format window on the Spreadsheets tab.
Fix: This issue has been resolved.
6. **Bug description:** Cells with word wrap enabled were not displaying properly on the Spreadsheets tab.
Fix: This issue has been resolved.

Known Issues

XSLX files created from Spreadsheets or Event Resources tab will not open in OpenOffice

Files with the extension .xlsx that are created in the Spreadsheets or Event Resources tabs of Vivien will not open in OpenOffice. However, these files will open with Microsoft Excel 2007.
